Highlights

- Leading supplier of media servers, active storage systems and content management applications optimized for media workflows
- Pioneered the use of IT-based, open systems for broadcast and professional video
- Strong global presence with more than 1,200 systems deployed in 72 countries
- Over 23,900 channels and 19 petabytes of storage sold to date

Company

Omneon Inc. provides open platforms for the production, transformation, and distribution of digital media. Integrating video servers, storage systems and media processing services, Omneon delivers a flexible and scalable infrastructure, empowering customers to use the applications of their choice and deploy workflows tailored to their requirements. Omneon has established an extensive global presence with customers in more than 50 countries on six continents. The company is on the Web at www.omneon.com.

Products

Products include Omneon MediaDeck™ and Spectrum™ video servers, MediaGrid™ active storage systems and MediaTool™ software applications. Omneon MediaDeck and Spectrum video servers provide reliable real-time recording and playback of multiple channels of high-quality program content. MediaGrid active storage systems enable high-bandwidth simultaneous access to stored content by multiple users, as well as high-performance media processing. Omneon applications provide content management, transcoding and system control functionality. Together these products deliver an integrated solution that enables more efficient digital media production and distribution workflows.

Key Customers

BBC (UK), BSKYB (UK), CBC (Canada), CBS (USA), Chellomedia (Netherlands), Crown Castle (USA), Danish Radio (Denmark), Deutsche Welle (Germany), Discovery Networks (USA), FOX (USA), Lifetime Networks (USA), Nord Deutscher Rundfunk (Germany), NRK (Norway), PBS (USA), Qualcomm (USA), Raycom Media (USA), Scripps Networks (USA), SKY PerfecTV (Japan), Star TV (Hong Kong), Ten Network (Australia), Time Warner (USA), Univision (USA), Viacom (USA)
